## THE ARCHITECTURAL ELEMENTS

## THE CHALLENGE

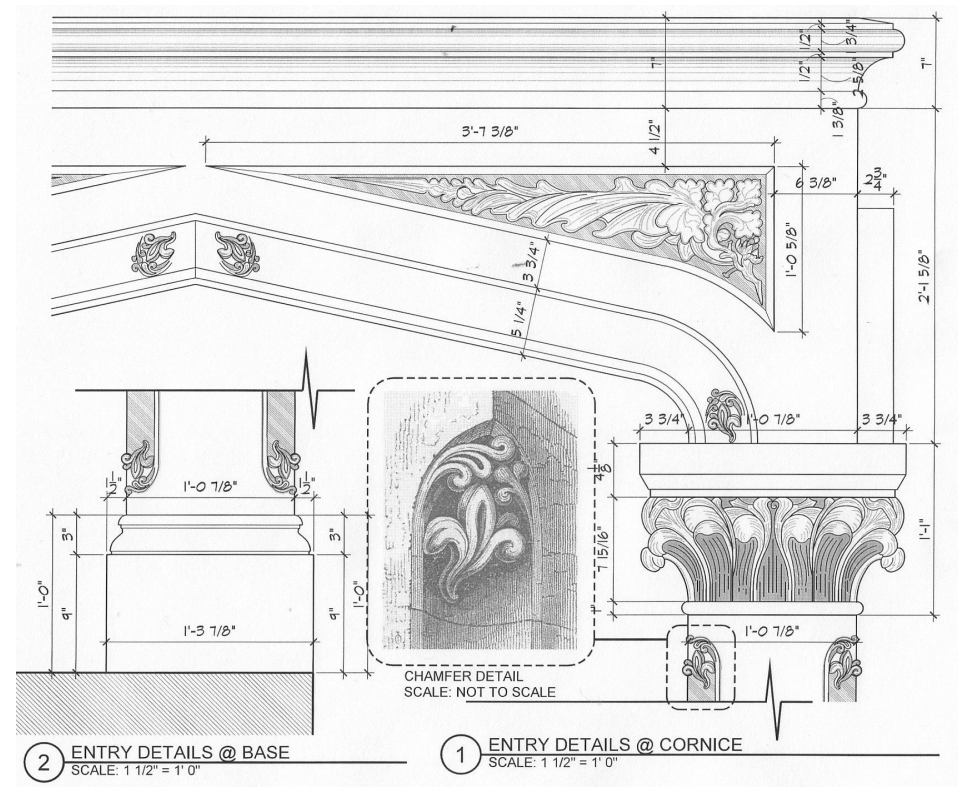

Create a period specific entry for this renovated Tudor home, make it unique to the neighborhood filled with other Tudor styled homes, and finish it with a patina that looks original to it's approximately 80 year history.

We started by going through our library to find decorative tudor elements that could be combined into an entry that fit this light, family home; avoiding a daunting, cathedral look.

An extensive set of drawings were then created that left nothing up to the interpretation of the carver.

Upon completion of the carving, each piece was photographed at the factory and sent to the architect and home owner so it could be either approved, or reworked prior to delivery.

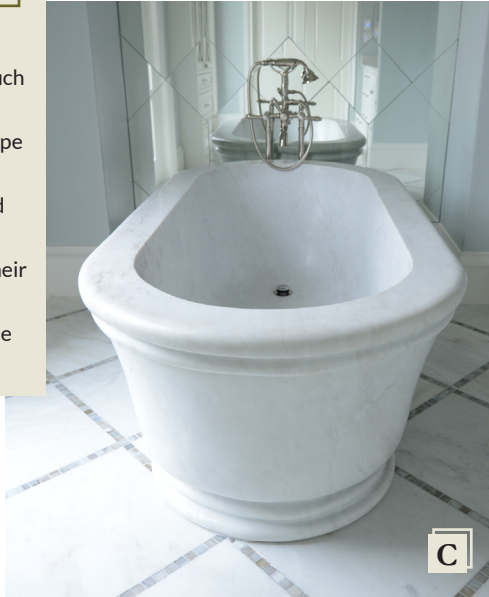

After the installation was finished, we all stood beneath it gazing up with proud grins. This is how we approach every custom project.

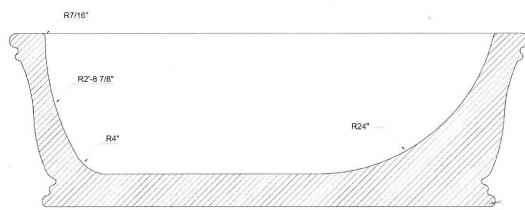

## MODERN ROMAN BATH EXPERIENCE

For anyone who has enjoyed an afternoon in a centuries old Roman Bath the soft, natural touch of marble on your skin is undeniably relaxing. We improved upon this by carving a gentle slope inside the Amalfi Bath Tub that comfortably supports your head, neck, shoulders, back, and hips. Those inside are able to lay their head above water without requiring any effort of their own. This allows you to completely release all muscle tension in your body and enjoy a unique spa experience inside your own home.

We work closely with our clients through the entire Custom Design, carving, and installation process. After getting a good understanding of what is important to them, we provide detailed CAD drawings that must be approved before the sculpting begins. We then provide photographs so the client may request changes to the sculpture prior to shipping. We also assist with delivery and installation consultation.
