

## The Great Gatsby: *Marble/Aluminum*

The design concept of this series was inspired by the New York lifestyle back in the 1920's. That's when America became the permanent power in the world. This period was also known as the "Roaring Twenties". During this period, we witnessed many major developments in our culture which we still feel the impact today. The birth of the jazz, women's suffrage movement and Manhattan became the world's financial center. This also included the automobile, radio and Hollywood movie culture. This series is to pay tribute to the unique American contribution to world culture.
